

HENRIETTA SAM

FRONTEND WEB DEVELOPER

ABOUT

A seasoned web developer with a wide range of skills in programming languages and frameworks. Proficient with HTML, CSS, JAVASCRIPT, JQUERY and a working knowledge of REACT. I have an excellent ability to communicate with clients, team members and to ensure the total understanding of project requirements. I build visually appealing websites because I have a keen eye for details and also, I ensure they reflect the principles of user experience design.

WORK EXPERIENCE

Freelancer

UPWORK, TALEDO, FIVERR

October 2020–Till date

I have been working as a freelancer so as to hone my skill to the apex which I have succeeded at. In the course of this, I worked for brands, built websites with or without initial designs and helped create user-friendly sites.

I provided top-notch services by writing efficient codes, creating responsive websites using HTML, CSS, JAVASCRIPT and JQUERY.

I built landing-pages, multi-paged websites, templates and made sure they were compatible across every device/browser.

I collaborated with other designers/developers to ensure the smooth representation of products on every website which was created and made sure the frontend code interacted correctly with the backend functionality.
